# MOE Regulations Regarding International Students Undertaking Studies in Taiwan

*\* Notes: In the event of discrepancies between the Chinese version and the English version of this Regulation, the Chinese version shall prevail.*

Amended on September 8, 2017

- Article 1 These Regulations are formulated in accordance with the provisions of Article 25, Paragraph 3 of the University Act, Article 32, Paragraph 1 of the Junior College Act, Article 41, Paragraph 1 of the Senior High School Education Act, and Article 6, Paragraph 3 of the Primary and Junior High School Act.
- Article 2 A person of foreign nationality who has never held Republic of China (“R.O.C.”) nationality and who does not have overseas Chinese student status at the time of their application is permitted to apply for admission to an educational institution, in accordance with these Regulations.  
A person of foreign nationality who meets the following requirements and who in the immediate past has resided overseas continuously for at least six years is also permitted to apply for admission to an educational institution, in accordance with these Regulations. However, a person who plans to apply to study in a university department of medicine, dentistry, or Chinese medicine must have resided overseas continuously for at least eight years.
1. A person who at the time of their application also holds dual R.O.C. nationality shall have never had household registration in Taiwan.
  2. A person who before the time of their application also held dual R.O.C. nationality but no longer does at the time of their application shall have renounced their R.O.C. nationality with the approval of the Ministry of the Interior on a date at least eight full years before making their application.
  3. The persons referred to in the preceding two subparagraphs must have never previously undertaken studies in Taiwan as an overseas Chinese student nor have accepted a placement by the University Entrance Committee for Overseas Chinese Students in the current academic year.
- A foreign national who was selected by a foreign government, organization, or school to study in Taiwan in accordance with the Education Cooperation Framework Agreement, and who has never had household registration in Taiwan may be given exemption from the restrictions set out in the preceding two paragraphs if the competent education administrative authority gives approval. The periods of six years and eight years stipulated in Paragraph 2 shall be calculated using the starting date of the semester (February 1, or August 1) as the end date of the period. The term “overseas” used in Paragraph 2 refers to countries or regions other than the Mainland Area, Hong Kong, and Macau; the term “reside overseas continuously” means that an international student has stayed in Taiwan for no more than a total of 120 days in each calendar year. When calculating the number of consecutive years spent overseas, if the initial or final year of the period is not a complete calendar year, any time spent in Taiwan in the initial or final year must not exceed 120 days. However, time that a person has spent in Taiwan is not subject to this restriction and it is not counted when calculating how long they were in Taiwan in a particular year if the person has documentary proof that they:
1. Attended an overseas youth training course organized by the Overseas Compatriot Affairs Council or a technical professional training program accredited by the Ministry of Education;
  2. spent a total period of less than two years undertaking Chinese language classes at a Chinese language center at a university or tertiary college which has Ministry of Education approval to recruit students overseas;
  3. spent a total period of less than two years in Taiwan as an exchange student; or
  4. spent a total period of less than two years undertaking an internship that they came to Taiwan to undertake with the approval of the designated central competent authority;
- A person who held both foreign and R.O.C. nationalities and applied for annulment of their R.O.C. nationality before the date of effect of the February 1, 2011 amendment to these Regulations may apply for admission as an international student in accordance with the provisions in place before the amendment and is not subject to the restrictions set out in Paragraph 2.
- Article 3 An applicant of foreign nationality, who is eligible for permanent residence in Hong Kong or Macao, who has never had household registration in Taiwan, and who at the time of their application has resided in Hong Kong, Macao, or elsewhere overseas continuously for at least six years may apply for admission in accordance with the provisions of these Regulations. However, a person who plans to apply to study in a university department of medicine, dentistry, or Chinese medicine must have resided overseas continuously for at least eight years. The term “resided [ ... ] continuously” in the preceding paragraph means that a person did not spend more than a total of 120 days in Taiwan in each calendar year. However, this restriction does not apply if a person can present documentary proof that any of the circumstances listed in Paragraph 5, Subparagraphs 1 to 4 of the previous article apply. The time that they spent in Taiwan in the ways listed is not counted when calculating the period of continuous residence referred to in the previous paragraph. A person who was formerly from the Mainland Area and who has foreign nationality and has never had household registration in Taiwan, and who at the time of their application has resided overseas continuously for at least six years may apply for admission to an educational institution, in accordance with the provisions of these Regulations. However, a person who plans to apply to study in a university department of medicine, dentistry, or Chinese medicine must have resided overseas continuously for at least eight years. The term “resided [ ... ] continuously” in the preceding paragraph means that a person did not spend more than a total of 120 days in Taiwan in each calendar year. However, this restriction does not apply if a person can present documentary proof that any of the circumstances listed in Paragraph 5, Subparagraphs 1 to 4 of the previous article apply. The time that they spent in Taiwan in the ways listed is not counted when calculating the period that they resided continuously overseas referred to in the previous paragraph. The periods of six years and eight years stipulated in Paragraph 1 and in Paragraph 3 shall be calculated using the starting date of the semester (February 1, or August 1) as the end date of the period. The definition of “overseas” given in Paragraph 5 of the previous article also applies, *mutatis mutandis*, to Paragraphs 1 to 4.

- Article 4** An international student applying to study at an educational institution in Taiwan in accordance with the provisions of the two previous articles is limited to only applying once [English note: a person may apply to more than one educational institution, but if one of these applications is successful and they then study in Taiwan, they cannot subsequently apply to study at another educational institution for a course at that level]. After completing the course of study at the educational institution to which they applied, unless the student is applying for admission to a program for a master's degree or a higher degree, which may be handled by each university in accordance with its regulations, if the students wants to continue studying in Taiwan, their application shall be handled in the same manner as the admission procedures for domestic students.
- Article 5** In principle, the actual number of places available for international students to be admitted to universities and two-year programs at junior colleges (hereunder referred to as "universities and tertiary colleges") is limited to an additional ten percent above the institution's admission quota approved for that academic year by the Ministry of Education, and that number shall be incorporated into the total admission quota and reported to the Ministry of Education for approval. A university or junior college applying to recruit more than an additional ten percent shall submit a report of the planned increment (including associated quality control strategy and supportive measures) to the Ministry of Education for approval. Degree programs offered by collaborating domestic and foreign universities that have been approved on a case by case basis by the Ministry of Education are not subject to this restriction. The actual number of international students that may be admitted to a five-year program at a junior college, or to a senior secondary school, junior high school, or an elementary school is limited up to an additional ten percent above the institution's admission quota for that academic year that was approved by the competent education administrative authority, and that number shall be included in the total number of students admitted for that academic year and be reported to the competent education administrative authority for approval. Universities and tertiary colleges may admit international students to take up places at their institution available to local students within the approved admission quota for that academic year which remain vacant. The admission quotas referred to in Paragraph 1 and Paragraph 2 do not include international students who are not officially registered as a current student.
- Article 6** A university or tertiary college that recruits and admits international students shall formulate its own admission regulations and make these public after they have been approved by the Ministry of Education, and formulate a set of international student admission guidelines that outline details of the degree programs that admit international students, the length of time in which each program must be completed, admission quotas, admission eligibility requirements, reviewing and screening methods, and any other related regulations.
- Article 7** International students applying for admission to a university or tertiary college shall submit the following documents and apply directly to the university or college during its designated application period, and applicants who pass the review or screening process will be issued an admission notice:

However, academic credentials issued by a campus or branch that a foreign educational institution has established in the Mainland Area by a foreign educational institution shall be notarized by a notary public there and authenticated by an agency established or designated by the Executive Yuan, or by a private organization commissioned by the Executive Yuan.

If documents that have already been authenticated raise any doubts, the educational institution may request examination of the documents.
- Article 7-1** An international student who submits any certificate or document as part of their application for admission to an educational institution that is found to be forged, fabricated, or that has been altered in some way shall have their enrollment eligibility revoked. If the student has already registered and begun classes, their registration as a current student shall be cancelled and they will not be awarded any certification whatsoever regarding their related academic undertakings. If any such circumstances are first discovered after a student has already graduated, the educational institution shall revoke the former student's eligibility to graduate and shall require any degree already awarded to be returned and shall rescind it.
- Article 8** An international student who has completed a bachelor's degree or a higher degree in Taiwan and is applying to be admitted to do a master's degree program or a higher degree may submit copies of their graduation certificate from a university or tertiary college in Taiwan and transcripts for each year of their studies and apply in accordance with the provisions of Article 7 and is not subject to the provisions of Article 7, Paragraph 1, Item 2.

However, an international student who already has legitimate resident status or who is undertaking a program approved on a case by case basis by the Ministry of Education is not subject to this restriction.
- Article 11** An international student who reports to register at a university or tertiary college, a five-year program at a junior college, or a senior secondary school, junior high school, or an elementary school before it is already one-third of the way into the first semester of the current academic year shall be registered for the first semester. If it is already more than one-third of the way into the first semester, the international student shall register for the second semester or the next academic year. However, this restriction does not apply if each competent education administrative authority has some provision that overrides it.
- Article 12** An international student who with Ministry of Education approval is undertaking an internship after graduating from a university in Taiwan may have their international student status extended for up to one year after their graduation.  
An international student who has been permitted to undertake initial household registration, resident registration, naturalization, or restoration of R.O.C. nationality procedures during the course of their studies in Taiwan will forfeit their international student status and shall be dismissed by their educational institution.  
An international student who is dismissed from a university or tertiary college after admission as a result of unsatisfactory conduct, or poor academic performance, or a conviction in criminal case proceedings is not permitted to re-apply for admission to an educational institution under these Regulations.  
Each university or tertiary college shall formulate its own regulations regarding transfers of international students, incorporate these into its admission regulations, and submit these to the Ministry of Education for approval. However, an international student who has been dismissed by the educational institution that admitted the student as a result of unsatisfactory conduct or of a conviction in criminal case proceedings is not permitted to transfer to another university or tertiary college.
- Article 13** A university or tertiary college may sign an education cooperation agreement with a foreign educational institution and recruit and admit international exchange students, provided that this does not affect normal teaching. A university or tertiary college may also apply, *mutatis mutandis*, its own international student admission regulations to accept suitable international students as non-degree students. With approval from each competent education administrative authority, senior secondary schools, junior high schools, and elementary schools may recruit international students for short-term periods of study in Taiwan of one year or less.
- Article 14** Educational institutions at all levels that establish programs exclusively for international students as part of an international academic cooperation program or to meet some other special need shall do so in accordance with the regulations governing overall scale of and resources for development of an educational institution at their level, and the competent education administrative authority will forward details of such programs for appraisal and approval by the Ministry of Education.
